

# Kopwin MTS-800 MultiTool Survival Shovel

## Is the survival shovel the ultimate survival tool?

In our lives we can sometimes be faced with a serious emergency survival situation. This could be a serious fire, flood, hurricane, earthquake, you could be trapped in the wilderness, or there could be some sort of political upheaval. To ensure you survive through these crises, it's prudent to have adequate food, water, medical supplies and other gear for you and your family. It's also a good idea to have some survival tools on hand as well because you never know when you'll need a tool to do a specific job. No one tool can do everything, but as most survivalist and preppers will tell you, having a back up tool is vitally important. The ultimate back up multitool is the survival shovel and they're generally so small and compact that they can easily fit into your bug out bag. They're also perfect for backpacking because backpacking can quickly become a wilderness survival situation.

### Kopwin Survival shovels!

One survival tool we often need is a good portable shovel. You're probably now thinking of an entrenching tool that is used by the military:

### Entrenching tool in action

A camping shovel is a critical tool because we often need one to dig a fire pit or a sanitation hole, for example. They're quite small shovels, about a foot and a half that also have a bunch of other features included.

## Other uses for your new Kopwin Multitool Shovel

- Hammering
- Opening a bottle
- As a paddle
- Chopping
- Sawing
- An anchor
- As a hoe
- As a pick
- Sanitation – you don't want the germs from waste to make you sick
- A hook to climb
- As a blade for clearing brush
- To dig cat holes
- Getting your vehicle out of trouble if you're off road
- Bury trash – for hygiene purposes and also to cover your tracks
- Covering your tracks – if you don't want to be found, you need to cover your tracks
- As a weapon
- Making fire pits
- Clearing brush
- To use as a stake when making a shelter
- Fire suppression – you can easily put out a fire
- Water purification
- Staving off infections from cuts – if you dig with sticks you're much more likely to cut your hands or forearms
- Tactical knife
- Whistle
- Paracord

## And there is more.....

- Extracting nails
- Safer camp fires – you can dig a hole for your fire so it's less likely to spread
- Scale fish
- Pry tool
- When your vehicle runs off the road or get stuck in muck, shovel dirt under the tires to get going again
- If your indoor sanitation facilities go kaput, dig yourself a pit toilet or latrine
- Control a campfire by building trenches outside of the ring of fire
- Dig edible roots while foraging for food
- Likewise, enjoy free food as you dig clams, geoducks, and oysters at the beach
- Use as an all-purpose garden shovel and hoe
- Dig a hole to store your hidden cache and then later, retrieve your items
- Kill snakes and varmints
- Build a trench around your shelter during under adverse conditions
- Dig a fox hole for hiding and keeping warm at night
- Build in-ground traps to snare predators
- Chop branches and wood for building fires or for use in a rocket stove
- Folded at 90 degrees, use as a pick axe to break through snow and ice on your porch or driveway
- Use the handle to serve as a makeshift TP holder (I just had to include this one!)
- Use as a personal weapon for self-defense when chasing bad-guys or zombies
- New item

**\*\*It's also a great option to keep in your vehicle for a "just in case" situation because it's simply so versatile.\*\***

## Using your new Kopwin Multitool Shovel

Your new Kopwin shovel has many many uses and functions and we will try to cover most of them here.

As you can see above, it can be put together using all the pieces or the pieces can be used together with different integrations.

Let's have a look at the different integrations and features of all the tools in your new shovel kit.....

As shown below, the SHOVEL HANDLE can be used with 3 different sizes, depending on how many handle pieces are screwed together.

**Short Handle**

**Medium Handle**

**Long Handle**

The ICE-PICK ACCESSORY can be screwed inside one of the 2 handle extensions as shown below...

In the same way as the ice picker can be screwed into one of the handles, the **KNIFE ACCESSORY** can do the same.

The **SCREWDRIVER ACCESSORY** is inserted into the top part of the handle, the one with the compass at the top.

The top part of the handle that contains the compass, can be unscrewed to reveal the FLINT and EMERGENCY WHISTLE.

The FLINT is magnesium for easier and better striking results and is also replace by simply unscrewing from the base.

THANK YOU again for purchasing our products!

We are PROUD to use our products and also PROUD to sell them!
